Contents

1	General Requirements	2
2	Installation on Windows	2
3	Installation on Linux	2
4	Installation on MacOS	2

1 General Requirements

There are versions of iBioSim available for Windows, Linux, and MacOS. You can download the appropriate installation file from:

<http://www.async.ece.utah.edu/iBioSim> To install follow the instructions for your operating system below.

DESCRIBE Java, Graphviz requirements

2 Installation on Windows

Download and execute iBioSim-`<version>`-Setup.exe. MORE HERE

EXPLAIN UNINSTALL

3 Installation on Linux

Download iBioSim-`<version>`-Linux-x86-Install. Change permissions on this file to allow it to be executed:

`chmod u+x iBioSim-<version>-Linux-x86-Install`. Executing this file will now start the install shield.
